### LEGEND

E: extreme/significant risk; immediate action required; must be managed by senior management with a detailed plan, notify RMO immediately.

H: high risk; senior management attention needed; detailed research and management planning at senior levels.

M: moderate risk; management responsibility must be specified; manage by specific monitoring or response procedures.

L: low risk; manage by routine procedures; unlikely to need specific allocation of resources

### Details of Action to be Taken

Actions: (When determining action, refer to Hierarchy of Risk Control.)

**Boomerang/Canvas/Bark/Message Stone Painting** – supervised exposure to paints and traditional brush tools. Perceived risks are considered negligible as all materials will be prepared in advance and constant supervision will be provided by activity leaders during the process

**Demonstration of Tree Bark Removal** – participants viewing demonstration conducted by experienced leader. Manageable perceived risks by ensuring participants are suitably attired (eg: enclosed footwear, hats) and are corralled a safe distance from the demonstration. Demonstrator to be inducted in process, use and maintenance of tools and suitable attire required (eg; enclosed footwear, safety eyewear)
